

Contents

Part I Foundation

| | | |
|----------|-----------------------------------------------|----|
| 1 | Introduction | 3 |
| 1.1 | A Broad View of Data Systems | 3 |
| 1.1.1 | Reading Questions | 7 |
| 1.2 | The Sources of Data | 7 |
| 1.2.1 | Reading Questions | 9 |
| 1.3 | The Forms of Data | 9 |
| 1.3.1 | Reading Questions | 12 |
| 1.4 | Book Organization | 13 |
| 1.4.1 | Exercises | 14 |
| 2 | File Systems and File Processing | 17 |
| 2.1 | File Systems | 18 |
| 2.1.1 | Hierarchical Organization | 19 |
| 2.1.2 | Paths | 21 |
| 2.1.3 | Python File System and Path Facilities | 23 |
| 2.1.4 | Reading Questions | 25 |
| 2.1.5 | Exercises | 26 |
| 2.2 | File Level Operations | 27 |
| 2.2.1 | File Open and Close | 29 |
| 2.2.2 | Text File Encoding | 35 |
| 2.2.3 | Reading Questions | 37 |
| 2.2.4 | Exercises | 39 |
| 2.3 | Processing Files for Data | 41 |
| 2.3.1 | Single Data Item per Line | 41 |
| 2.3.2 | Multiple Data Items per Line | 45 |
| 2.3.3 | Reading Questions | 48 |
| 2.3.4 | Exercises | 49 |
| 2.4 | JSON File Processing | 51 |
| 2.4.1 | Writing Data Structures to JSON | 52 |
| 2.4.2 | Reading Data Structures from JSON | 53 |

- 2.4.3 Reading Questions 54
- 2.4.4 Exercises 55
- 3 Python Native Data Structures 59**
 - 3.1 List Patterns 60
 - 3.1.1 Accumulation 61
 - 3.1.2 Unary Vector Operations 61
 - 3.1.3 Binary Vector Operations 63
 - 3.1.4 Filter 64
 - 3.1.5 Reduction 65
 - 3.1.6 Reading Questions 65
 - 3.1.7 Exercises 67
 - 3.2 Dictionaries 70
 - 3.2.1 Reading Questions 72
 - 3.2.2 Exercises 73
 - 3.3 Python Features 76
 - 3.3.1 Functions as Objects 76
 - 3.3.2 Lambda Functions 78
 - 3.3.3 List Comprehensions 80
 - 3.3.4 Reading Questions 82
 - 3.3.5 Exercises 84
 - 3.4 Representing General Data Sets 88
 - 3.4.1 Dictionary of Lists 91
 - 3.4.2 List of Lists 92
 - 3.4.3 List of Dictionaries 94
 - 3.4.4 Reading Questions 96
 - 3.4.5 Exercises 98
- 4 Regular Expressions 103**
 - 4.1 Motivation 104
 - 4.1.1 Reading Questions 106
 - 4.2 Terminology 107
 - 4.2.1 Reading Questions 108
 - 4.3 The Regular Expression Language 108
 - 4.3.1 Literal Characters 109
 - 4.3.2 Single Character Wildcard Matching 110
 - 4.3.3 Repetition 112
 - 4.3.4 Disjunction 113
 - 4.3.5 Boundaries/Anchors 113
 - 4.3.6 Grouping 114
 - 4.3.7 Flags 115
 - 4.3.8 Reading Questions 117
 - 4.3.9 Exercises 118
 - 4.4 Python Programming with Regular Expressions 120
 - 4.4.1 Specifying Patterns 120
 - 4.4.2 The re Module Interface 120

- 4.4.3 Reading Questions 124
- 4.4.4 Exercises 125

Part II Data Systems: The Data Models

- 5 Data Systems Models** 131
 - 5.1 Data Model Framework 131
 - 5.1.1 Structure 132
 - 5.1.2 Operations 133
 - 5.1.3 Constraints 134
 - 5.1.4 Reading Questions 135
 - 5.2 Tabular Model Overview 135
 - 5.2.1 Structure 136
 - 5.2.2 Operations 137
 - 5.2.3 Constraints 137
 - 5.2.4 Reading Questions 138
 - 5.3 Relational Model Overview 138
 - 5.3.1 Structure 138
 - 5.3.2 Operations 140
 - 5.3.3 Constraints 141
 - 5.3.4 Reading Questions 141
 - 5.4 Hierarchical Model Overview 141
 - 5.4.1 Structure 142
 - 5.4.2 Operations 143
 - 5.4.3 Constraints 143
 - 5.4.4 Reading Questions 144
- 6 Tabular Model: Structure and Formats** 145
 - 6.1 Tidy Data 146
 - 6.1.1 Reading Questions 151
 - 6.1.2 Exercises 151
 - 6.2 Tabular Data Format 153
 - 6.2.1 Format Background 153
 - 6.2.2 Format for Tabular Data 153
 - 6.2.3 Tabular Format File Processing 156
 - 6.2.4 Reading Questions 158
 - 6.2.5 Exercises 158
 - 6.3 Tabular Structure as pandas DataFrame 160
 - 6.3.1 DataFrame Creation 161
 - 6.3.2 Operations Involving Whole Data Frames 166
 - 6.3.3 Reading Questions 171
 - 6.3.4 Exercises 172
- 7 Tabular Model: Access Operations and pandas** 175
 - 7.1 Tabular Operations Overview 176
 - 7.1.1 Access Operations 176

| | | |
|----------|---------------------------------------------------------------|------------|
| 7.1.2 | Computational Operations | 177 |
| 7.1.3 | Mutation Operations | 177 |
| 7.1.4 | Advanced Operations | 178 |
| 7.1.5 | Reading Questions | 179 |
| 7.2 | Preliminaries and Example Data Sets | 179 |
| 7.2.1 | Reading Questions | 182 |
| 7.3 | Access and Computation Operations | 182 |
| 7.3.1 | Single Column Projection and Vector Operations | 182 |
| 7.3.2 | Multicolumn Projection of a DataFrame | 187 |
| 7.3.3 | Row Selection by Slice | 188 |
| 7.3.4 | Row Selection by Condition | 190 |
| 7.3.5 | Combinations of Projection and Selection | 193 |
| 7.3.6 | Iteration over Rows and Columns | 199 |
| 7.3.7 | Reading Questions | 200 |
| 7.3.8 | Exercises | 202 |
| 8 | Tabular Model: Advanced Operations and pandas | 205 |
| 8.1 | Aggregating and Grouping Data | 206 |
| 8.1.1 | Aggregating Single Series | 206 |
| 8.1.2 | Aggregating a Data Frame | 208 |
| 8.1.3 | Aggregating Selected Rows | 210 |
| 8.1.4 | General Partitioning and GroupBy | 212 |
| 8.1.5 | Indicators Grouping Example | 215 |
| 8.1.6 | Reading Questions | 217 |
| 8.1.7 | Exercises | 218 |
| 8.2 | Mutation Operations for a Data Frame | 219 |
| 8.2.1 | Operations to Delete Columns and Rows | 220 |
| 8.2.2 | Operation to Add a Column | 223 |
| 8.2.3 | Updating Columns | 225 |
| 8.2.4 | Reading Questions | 227 |
| 8.2.5 | Exercises | 227 |
| 8.3 | Combining Tables | 229 |
| 8.3.1 | Concatenating Data Frames Along the Row Dimension | 230 |
| 8.3.2 | Concatenating Data Frames Along the Column Dimension | 234 |
| 8.3.3 | Joining/Merging Data Frames | 237 |
| 8.3.4 | Reading Questions | 243 |
| 8.3.5 | Exercises | 244 |
| 8.4 | Missing Data Handling | 245 |
| 8.4.1 | Reading Questions | 248 |
| 9 | Tabular Model: Transformations and Constraints | 249 |
| 9.1 | Tabular Model Constraints | 250 |
| 9.1.1 | Reading Questions | 251 |
| 9.1.2 | Exercises | 251 |

- 9.2 Tabular Transformations 252
 - 9.2.1 Transpose 253
 - 9.2.2 Melt 254
 - 9.2.3 Pivot 260
 - 9.2.4 Reading Questions 268
 - 9.2.5 Exercises 270
- 9.3 Normalization: A Series of Vignettes 271
 - 9.3.1 Column Values as Mashup 272
 - 9.3.2 One Relational Mapping per Row 274
 - 9.3.3 Columns as Values and Mashups 277
 - 9.3.4 Exactly One Table per Logical Mapping 282
 - 9.3.5 Reading Questions 286
- 9.4 Recognizing Messy Data 287
 - 9.4.1 Focus on Each Column as Exactly One Variable (TidyData1) 287
 - 9.4.2 Focus on Each Row Giving Exactly One Mapping (TidyData2) 288
 - 9.4.3 Focus on Each Table Representing One Data Set (TidyData3) 288
 - 9.4.4 Reading Questions 289
 - 9.4.5 Exercises 290
- 10 Relational Model: Structure and Architecture 293**
 - 10.1 Background 295
 - 10.1.1 Motivation and Requirements 295
 - 10.1.2 The Relational Database Solution 298
 - 10.1.3 Types of Relational Databases 299
 - 10.1.4 Reading Questions 300
 - 10.2 Structure 300
 - 10.2.1 Single Table Characteristics 301
 - 10.2.2 Multiple Table Characteristics 305
 - 10.2.3 Reading Questions 308
 - 10.3 Database Architecture 309
 - 10.3.1 Reading Questions 312
- 11 Relational Model: Single Table Operations 313**
 - 11.1 Example Data Sets 315
 - 11.1.1 Reading Questions 317
 - 11.2 Projecting Column Fields 318
 - 11.2.1 Single Column Field Projection 319
 - 11.2.2 Multiple Column Field Projection 319
 - 11.2.3 Simple Subquery 321
 - 11.2.4 Ordering Results 322
 - 11.2.5 Reading Questions 325
 - 11.2.6 Exercises 325

- 11.3 Selecting and Filtering Rows 327
 - 11.3.1 Uniqueness Filtering 327
 - 11.3.2 Row Selection by Filtering 329
 - 11.3.3 Missing Values 334
 - 11.3.4 Additional Examples 335
 - 11.3.5 Reading Questions 336
 - 11.3.6 Exercises 337
- 11.4 Column-Vector Operations 338
 - 11.4.1 Reading Questions 340
 - 11.4.2 Exercises 340
- 11.5 Aggregation 341
 - 11.5.1 Counting Rows for Fields 341
 - 11.5.2 Reading Questions 343
 - 11.5.3 Exercises 343
- 11.6 Partitioning and Aggregating 344
 - 11.6.1 Reading Questions 347
 - 11.6.2 Exercises 347
- 12 Relational Model: Multiple Tables Operations 349**
 - 12.1 Preliminaries and Example Data Set 350
 - 12.1.1 Data Set: The `school` Database Schema 350
 - 12.1.2 Table Relationships 350
 - 12.1.3 SQL Execution Plan 353
 - 12.1.4 Reading Questions 354
 - 12.1.5 Exercises 355
 - 12.2 Overview of Join Operations 356
 - 12.3 Inner Joins 358
 - 12.3.1 Two Table SQL Inner Join 358
 - 12.3.2 [Optional] Cartesian Product-Based Inner Join 362
 - 12.3.3 Inner Join to Fill Redundant Fields 363
 - 12.3.4 Three-Table Join 365
 - 12.3.5 Join Table from a Subquery 367
 - 12.3.6 Reading Questions 369
 - 12.3.7 Exercises 370
 - 12.4 Outer Joins 371
 - 12.4.1 Left and Right Joins 372
 - 12.4.2 Full Outer Join 376
 - 12.4.3 Reading Questions 379
 - 12.4.4 Exercises 380
 - 12.5 Partitioning and Grouping Information 380
 - 12.5.1 Reading Questions 382
 - 12.5.2 Exercises 383
 - 12.6 Subqueries 384
 - 12.6.1 Reading Questions 387
 - 12.6.2 Exercises 388

- 13 Relational Model: Database Programming** 391
 - 13.1 Making Connections 393
 - 13.1.1 The Connection String 394
 - 13.1.2 Connecting and Closing 396
 - 13.1.3 Reading Questions 398
 - 13.1.4 Exercises 399
 - 13.2 Executing Queries and Basic Retrieval of Results 400
 - 13.2.1 Basic Query and Fetching Results 400
 - 13.2.2 Reading Questions 404
 - 13.2.3 Exercises 405
 - 13.3 More Advanced Techniques 406
 - 13.3.1 Record at a Time 406
 - 13.3.2 Chunks 408
 - 13.3.3 Working with Multiple Databases 411
 - 13.3.4 Reading Questions 413
 - 13.3.5 Exercises 414
 - 13.4 Incorporating Variables 414
 - 13.4.1 Python String Composition 415
 - 13.4.2 Binding Variables 417
 - 13.4.3 Reading Questions 420
 - 13.4.4 Exercises 421
- 14 Relational Model: Design, Constraints, and Creation** 425
 - 14.1 Motivation and Process 426
 - 14.2 Designing Tables 428
 - 14.2.1 Functional Dependencies 428
 - 14.2.2 Table Design: Advice and Best Practices 429
 - 14.2.3 Table Primary Key 430
 - 14.2.4 Reading Questions 431
 - 14.2.5 Exercises 431
 - 14.3 Table Fields 432
 - 14.3.1 Single Field Issues 432
 - 14.3.2 Field Relationship Issues 433
 - 14.3.3 Field Data Types 435
 - 14.3.4 Field Design: Advice and Best Practices 435
 - 14.3.5 Reading Questions 436
 - 14.3.6 Exercises 437
 - 14.4 Relationships Between Tables 438
 - 14.4.1 Designing for Many-to-One Relationships 438
 - 14.4.2 Designing for Many-to-Many Relationships 440
 - 14.4.3 Reading Questions 441
 - 14.4.4 Exercises 441
 - 14.5 Table and Schema Creation 442
 - 14.5.1 Fields 443
 - 14.5.2 Table Constraints 444

- 14.5.3 Programming and Development Advice..... 447
- 14.5.4 Reading Questions..... 450
- 14.5.5 Exercises..... 450
- 14.6 Table Population..... 452
 - 14.6.1 Examples..... 453
 - 14.6.2 Programming for Table Population..... 454
 - 14.6.3 Reading Questions..... 460
 - 14.6.4 Exercises..... 460
- 15 Hierarchical Model: Structure and Formats..... 463**
 - 15.1 Motivation..... 464
 - 15.2 Representation of Trees..... 465
 - 15.2.1 Terminology..... 466
 - 15.2.2 Python Native Data Structures and Nesting..... 467
 - 15.2.3 Traversals and Paths..... 472
 - 15.2.4 Reading Questions..... 472
 - 15.3 JSON..... 473
 - 15.3.1 Reading Questions..... 475
 - 15.3.2 Exercises..... 476
 - 15.4 XML..... 477
 - 15.4.1 XML Structure..... 477
 - 15.4.2 Extracting Data from an XML File..... 481
 - 15.4.3 Reading Questions..... 484
 - 15.4.4 Exercises..... 484
- 16 Hierarchical Model: Operations and Programming..... 487**
 - 16.1 Operations Overview..... 488
 - 16.1.1 Reading Questions..... 490
 - 16.2 JSON Procedural Programming..... 490
 - 16.2.1 Access and Traversal Operations Example..... 491
 - 16.2.2 Node Creation..... 497
 - 16.2.3 Node Attribute Updates..... 498
 - 16.2.4 Reading Questions..... 500
 - 16.2.5 Exercises..... 501
 - 16.3 XML Procedural Operations..... 502
 - 16.3.1 Reading and Traversing XML Data..... 503
 - 16.3.2 Creating XML Data..... 517
 - 16.3.3 Further Operations..... 521
 - 16.3.4 Reading Questions..... 521
 - 16.3.5 Exercises..... 522
 - 16.4 XPath..... 524
 - 16.4.1 Paths in XML Documents..... 525
 - 16.4.2 Paths and Expressions in XPath..... 526
 - 16.4.3 XPath Syntax..... 530
 - 16.4.4 XPath Axes..... 530
 - 16.4.5 XPath Predicates and Built-in Functions..... 533

| | | |
|----------------------------------------------------|-----------------------------------------------------|------------|
| 16.4.6 | Python Programming with XPath | 535 |
| 16.4.7 | Case Study Example | 539 |
| 16.4.8 | Reading Questions | 543 |
| 16.4.9 | Exercises | 544 |
| 17 | Hierarchical Model: Constraints | 547 |
| 17.1 | Motivation | 548 |
| 17.1.1 | Reading Questions | 550 |
| 17.2 | Well-Formed XML | 550 |
| 17.2.1 | Reading Questions | 552 |
| 17.3 | Document Type Definition | 552 |
| 17.3.1 | Declaring Elements | 553 |
| 17.3.2 | Declaring Attributes and Entities | 553 |
| 17.3.3 | Example DTD Declarations | 555 |
| 17.3.4 | DTD Validation of an XML Document | 555 |
| 17.3.5 | Exercises | 558 |
| 17.4 | XML Schema | 559 |
| 17.4.1 | Root of an XML Schema | 559 |
| 17.4.2 | Declaring Elements and Attributes | 560 |
| 17.4.3 | XSD Types | 562 |
| 17.4.4 | XSD Restrictions | 564 |
| 17.4.5 | An XSD Example | 566 |
| 17.4.6 | Validating an XML Document | 568 |
| 17.4.7 | Exercises | 570 |
| 17.5 | JSON Schema | 571 |
| 17.5.1 | Basics of JSON Schema | 572 |
| 17.5.2 | Validating a JSON Document Using a JSON Schema | 576 |
| 17.5.3 | Exercises | 577 |
| Part III Data Systems: The Data Sources | | |
| 18 | Overview of Data Systems Sources | 583 |
| 18.1 | Architecture | 584 |
| 18.2 | Data Sources | 585 |
| 18.2.1 | Local Files | 586 |
| 18.2.2 | Database Systems | 587 |
| 18.2.3 | Web Servers | 588 |
| 18.2.4 | API Service | 589 |
| 18.2.5 | Reading Questions | 590 |
| 19 | Networking and Client–Server | 591 |
| 19.1 | The Network Architecture | 592 |
| 19.1.1 | Host Addressing | 594 |
| 19.1.2 | Packet Switching and Routing | 594 |
| 19.1.3 | Summary Characteristics of the Network | 595 |
| 19.1.4 | Reading Questions | 596 |

- 19.2 The Network Protocol Stack 597
 - 19.2.1 Media Access Protocol Layer 599
 - 19.2.2 Network Protocol Layer 600
 - 19.2.3 Transport Protocol Layer 601
 - 19.2.4 The Socket Interface 602
 - 19.2.5 Application Protocols 603
 - 19.2.6 Reading Questions 603
- 19.3 Client–Server Model 604
 - 19.3.1 Server Application 605
 - 19.3.2 Client Application 607
 - 19.3.3 Reading Questions 607
- 20 The HyperText Transfer Protocol 609**
 - 20.1 Identifying Resources with URLs and URIs 611
 - 20.1.1 Host Locations 611
 - 20.1.2 Resource Paths 611
 - 20.1.3 URL Syntax 612
 - 20.1.4 Reading Questions 613
 - 20.2 HTTP Definition 614
 - 20.2.1 Message Format 615
 - 20.2.2 Request Messages 615
 - 20.2.3 Connections and Message Exchange 616
 - 20.2.4 Socket Level Programming Examples 617
 - 20.2.5 Request Header Lines 620
 - 20.2.6 Response Messages 621
 - 20.2.7 Redirection 624
 - 20.2.8 Reading Questions 625
 - 20.2.9 Exercises 626
 - 20.3 Programming HTTP Using `requests` 628
 - 20.3.1 GET Requests 630
 - 20.3.2 POST Requests 632
 - 20.3.3 Response Attributes 635
 - 20.3.4 Reading Questions 637
 - 20.3.5 Exercises 638
 - 20.4 Command Line HTTP with `curl` 640
 - 20.4.1 Basics 640
 - 20.4.2 Sending Custom Request Header Lines 644
 - 20.4.3 Query Parameters 645
 - 20.4.4 POST Requests 645
 - 20.4.5 Exploring Further 647
 - 20.4.6 Exercises 648
- 21 Interlude: Client Data Acquisition 649**
 - 21.1 Encoding and Decoding 650
 - 21.1.1 Python Strings and Bytes 652
 - 21.1.2 Prelude to Format Examples 654

- 21.1.3 Reading Questions 655
- 21.1.4 Exercises 656
- 21.2 CSV Data 658
 - 21.2.1 CSV from File Data 658
 - 21.2.2 CSV from Network Data 659
 - 21.2.3 Reading Questions 664
 - 21.2.4 Exercises 664
- 21.3 JSON Data 666
 - 21.3.1 JSON from File 666
 - 21.3.2 JSON from Network 667
 - 21.3.3 Reading Questions 671
 - 21.3.4 Exercises 671
- 21.4 XML Data 673
 - 21.4.1 XML from File Data 673
 - 21.4.2 From Network 674
 - 21.4.3 Reading Questions 677
 - 21.4.4 Exercises 678
- 22 Web Scraping** 681
 - 22.1 HTML Structure and Its Representation of Data Sets 682
 - 22.1.1 HTML Tables 685
 - 22.1.2 HTML Lists 687
 - 22.1.3 Reading Questions 689
 - 22.2 Web Scraping Examples 692
 - 22.2.1 Formulating Requests for HTML 693
 - 22.2.2 Simple Table 694
 - 22.2.3 Wikipedia Table 699
 - 22.2.4 POST to Submit a Form 704
 - 22.2.5 Reading Questions 711
 - 22.2.6 Exercises 713
- 23 RESTful Application Programming Interfaces** 715
 - 23.1 Motivation and Background 716
 - 23.1.1 General API Characteristics 718
 - General API Characteristics 718
 - 23.1.2 Principles of REpresentational State Transfer (REST) ... 718
 - Principles of REpresentational State Transfer (REST) 718
 - 23.1.3 Reading Questions 719
 - 23.2 HTTP for REST API Requests 720
 - 23.2.1 Endpoints 722
 - 23.2.2 Path Parameters 725
 - 23.2.3 Query Parameters 727
 - 23.2.4 Header Parameters 731
 - 23.2.5 POST and POST Body 732
 - 23.2.6 Reading Questions 736
 - 23.2.7 Exercises 738

- 23.3 Case Study 741
 - 23.3.1 Phase 1: Build a Table of Popular Movies 741
 - 23.3.2 Phase 2: Build Table of Top Cast Given Movie IDs 748
 - 23.3.3 Summary Comments 752
 - 23.3.4 Reading Questions 753
 - 23.3.5 Exercises 753
- 24 Authentication and Authorization 757**
 - 24.1 Background 758
 - 24.1.1 Principals 758
 - 24.1.2 Authentication and Authorization Concepts 759
 - 24.1.3 Impersonation 760
 - 24.1.4 Encryption, Keys, and Signatures 761
 - 24.1.5 Reading Questions 763
 - 24.2 Authentication and Privacy 764
 - 24.2.1 HTTPS 764
 - 24.2.2 HTTP Authentication 767
 - 24.2.3 Authentication Considerations 769
 - 24.2.4 Reading Questions 770
 - 24.2.5 Exercises 771
 - 24.3 Authorization 771
 - 24.3.1 OAuth2 Background 772
 - 24.3.2 Delegated Authority: Authorization Code Grant Flow ... 773
 - 24.3.3 OAuth Dance Walkthrough 783
 - 24.3.4 Reading Questions 791
 - 24.3.5 Exercises 792
- A Custom Software 797**
 - A.1 The util Module 798
 - A.1.1 buildURL 798
 - A.1.2 random_string 799
 - A.1.3 getLocalXML 800
 - A.1.4 read_creds 800
 - A.1.5 update_creds 801
 - A.1.6 print_text 802
 - A.1.7 print_data 804
 - A.1.8 print_xml 805
 - A.1.9 print_headers 806
 - A.2 The mysocket Module 807
 - A.2.1 makeConnection 808
 - A.2.2 sendString 808
 - A.2.3 receiveTillClose 809
 - A.2.4 sendBytes 810
 - A.2.5 receiveTillSentinel 811
 - A.2.6 receiveBySize 812
